Thomas, Oklahoma

**District elections
prove co-op values**

*Electing trustees ensures local
needs come first*

This month Kiwash Electric members in districts 2, 4 and 6 will select someone to represent them on the Kiwash Electric board of trustees. The opportunity to choose your representative is a distinct characteristic of electric co-ops that serves an important purpose.

Board members set the policies that govern your co-op. Giving each member a say in how the co-op is run ensures Kiwash Electric remains locally controlled and focused on local needs. Because board members are co-op members, too, they share the impact of their decisions.

Certain qualifications apply to serve on the board of trustees. The Kiwash Electric Cooperative bylaws defines the qualifications for trustees, and explains the process of nominating candidates.

An excerpt from the bylaws is printed on page 3. District meeting dates are published to the right.

good info to know

- ▶ The Kiwash Electric system is divided into nine districts. Each district is represented by a locally elected trustee.
- ▶ Kiwash Electric district elections take place every three years. When it is time for a district to nominate a candidate for the board, Kiwash Electric mails an official district meeting notice to members within the district. If you reside in districts 2, 4 or 6, you will receive a official notice in the mail advising you of the meeting date and location.

Meet your directors

JACK SAWATSKY
DISTRICT 2

Jack Sawatsky represents Kiwash Electric District #2. He and his wife, Karen, reside on a farm north of Cordell where they have lived for the past 31 years. Jack farms wheat and cattle, while Karen enjoys helping Jack on the farm and spending time with her three grandchildren.

Jack serves members in the general vicinity of Bessie.

■DISTRICT #2 MEETING
District 2 will meet Monday, July 28th at 7 pm at Kiwash Electric Cooperative office in Cordell.

ROBERT TRAVIS
DISTRICT 4

Robert Travis represents members in District #4. Since his election as trustee in 1980, he has held served as secretary/treasurer, vice president, and president of the board. Robert also serves on the board of the Oklahoma Association of Electric Cooperatives.

Robert and his wife, Karen, live northeast of Custer City. District #4 is in the vicinity of Custer City.

■DISTRICT #4 MEETING
The District #4 meeting takes place Tuesday, July 29th at 7 pm in the Kiwash Electric warehouse in Custer City.

LESLIE HINDS
DISTRICT 6

Leslie Hinds represents Kiwash Electric members in District #6, a position he has held since 1968. Leslie has served president of the board. He currently serves on the board of directors of Western Farmers Electric Cooperative in Anadarko.

Leslie and his wife, Frankie, live south of Burns Flat. District #6 covers the vicinity of Dill City and Burns Flat.

■DISTRICT #6 MEETING
District #6 members will meet Thursday, July 31st at 7 pm in the Burns Flat City Hall.

INSIDE YOUR CO-OP

By Dennis Krueger
GENERAL MANAGER

A smart way to keep the lights on

At Kiash Electric Cooperative, we believe the smart way to keep the lights on in the future is through a diverse portfolio of energy resources. Renewable energy sources, energy efficiency measures, new gas fired plants, and cleaner coal technology are all in our power supplier's energy mix for the future.

According to the U.S. Department of Energy (DOE), the demand for electricity in the U.S. is expected to increase by 40 percent over the next 22 years. Even with optimistic projections of a nine percent increase in efficiency and continued growth in renewable power sources, our nation may soon run out of generating capacity.

We must build more power plants and transmission lines to keep the lights on.

Co-ops have a great story to tell in how we're tackling each of these ambitious goals. In 2007, more than 12 percent of the Kiash Electric Cooperative energy mix was generated by zero emissions source— 9.8 percent hydro and 2.8 percent wind.

Kiash Electric and electric cooperatives across the nation are also recognized industry leaders in promoting energy efficiency and wise energy use. This helps reduce the need to build as much generation capacity.

When it comes to energy, Kiash Electric Cooperative recognizes that our consumers ultimately pay the freight for whatever decisions are made. As our commitment to you, we will work to ensure that our legislators and regulators

understand this fact as well. We will help identify practical long-term remedies based on new technology that will allow us to continue providing safe, reliable, and affordable power in an environmentally responsible fashion.

Western Farmers Electric Cooperative, our power provider, is working hard to provide a portfolio of diverse energy solutions. Thirty megawatts (MW) of distributive generation will be available in the next few months that

will help during the peak summer months. By year's end, 19 MW of new wind energy should be available through a contract with another wind farm developer.

As a part of WFEC's large capacity expansion project plan, 135 MW of new gas generation load will be available by the summer of 2009.

With ongoing upgrades, technological improvements and energy-saving programs for members, Kiash Electric and electric cooperatives across the nation are doing everything possible to meet future energy needs. Through it all, our drum beat will be loud and clear: "We're putting our consumers members first."

In 2007, more than 12 percent of the Kiash Electric Cooperative energy mix was generated by zero emissions source— 9.8 percent hydro and 2.8 percent wind.

CO-OP VALUES

You'll like this medicine.

New Co-op Connections card saves up to 60 percent on prescription drugs

Want to save money on your prescriptions? You can save up to 60 percent on prescriptions with the new and improved Touchstone Energy Co-op Connections Card. You'll be receiving your new card soon from Kiwash Electric Cooperative.

Your new Co-op Connections Card will still get you discounts on products and services at local businesses, and at more than 9,000 businesses nationwide.

To receive the discounts, all you have to do is use your card.

You will receive a letter in August with your new Co-op Connections Card attached. Be sure to carry the new card with you as you shop for products, eat out, travel, or pay for services or prescriptions.

Going on a trip? Be sure to check on the Internet in advance for Co-op Connections hotel, entertainment and travel discounts. In some cases, you may need to make your reservations online to receive your discounts.

ONLY ONE MORE MONTH UNTIL YOU RECEIVE YOUR NEW CONNECTIONS CARD!

A list of local, state, and national participating businesses and the discounts available will be available on the Kiwash Electric Web site at www.kiwash.coop. You should check this web page frequently for new participants and new or revised offers.

This valuable benefit is available to you because you are a member of Kiwash Electric Cooperative, a Touchstone Energy cooperative.

RECIPE BOX

Old Fashioned Peach Ice Cream

INGREDIENTS

- 4 cups milk
- 2 1/2 cups sugar
- 1/4 teaspoon salt
- 4 eggs, beaten
- 5 cups heavy cream
- 2 cups pureed peaches or nectarines
- 1 tablespoon vanilla extract
- 1/4 teaspoon almond extract (optional)

DIRECTIONS

In a heavy saucepan, heat milk over low until hot but not boiling. Stir in sugar and salt until dissolved. Gradually stir a quarter of the hot mixture into eggs, mixing constantly. Return all to the saucepan, stirring constantly. Continue to cook and stir for 10-12 minutes or until mixture coats the back of a metal spoon. Remove from the heat; cool. Chill for at least 2 hours or overnight. In a large bowl, combine the cream, fruit, vanilla and almond extract if desired. Add the chilled milk mixture, stirring well. Pour into a chilled freezer can of a 1-gallon ice cream freezer. Freeze according to manufacturer's instructions.

Kiwash Electric bylaws define trustee requirements

Qualifications

Qualifications of a trustee, as listed in the by-laws, Article IV, section 2, states that no person shall be eligible to become or remain a trustee or to hold any position of trust in the Cooperative who: (a) is not a member of the Cooperative and bonafide resident of the particular district which he is to represent; or (b) is in any way employed by or financially interested in a competing enterprise or a business selling electric energy or supplies to the Cooperative or a business primarily engaged in selling electrical or plumbing appliances, fixtures or supplies to the members of the Cooperative; or (c) is the incumbent of or candidate for an elective public office in connection with which a salary or compensation in excess of one hundred dollars per annum is paid; or (d) is an employee of the Cooperative, or has been employed by the Cooperative and termination of his employment has been less than five years; or (e) is a close relative of an incumbent Trustee or an employee of the Cooperative. "Close relative" is defined as a person who is related to the principal person by consanguinity or affinity within the third degree, including but not necessarily

limited to a person who is either a spouse, child, grandchild, great grandchild, parent, grandparent, great grandparent, brother, sister, aunt, uncle, nephew, or niece, by blood or in-law of the principal; or (f) has been convicted or pled guilty or nolo contendere to a felony.

Nominations

The procedure for nominating and electing trustees is outlined in Article III, Section 7, of the by-laws and states as follows: At a meeting of the Board of Trustees, not less than sixty days preceding each annual meeting of the members, the trustees shall fix a date which shall not be less than fourteen or more than thirty days preceding the annual meeting of the members for the holding of a district meeting for the members residing therein in each of the nine districts for the purpose of electing by ballot by and from the members of each district a trustee to serve as a trustee of the Cooperative. The Board of Trustees shall call the meetings and cause notice of each district meeting to be mailed by the secretary to each member not less than ten days before the meeting,

which call and notice shall indicate the district, which each member belongs. Each district meeting shall be called to order by the trustee, or in his absence, by any member residing within the district. The members shall then proceed to elect a chairman, who shall be someone other than a trustee, and a secretary, each to act for the duration of the meeting.

Five percent of fifteen members, whichever is the greater, of the members residing in the district present, at such duly called district meeting, shall constitute a quorum. Members of other districts at the meeting may be heard, but shall have no vote. Voting by Proxy shall not be permitted at such district meetings. The member in each voting district receiving the highest number of votes at the election held at such district meeting shall be elected a trustee of the Cooperative to take office immediately following the ensuing annual meeting of the members. Each trustee shall serve for the period of time for which he is elected or until a successor shall have been elected and shall have qualified.

Economic times are tough these days with increasing costs hitting us from all directions. Soaring gasoline, diesel, propane and natural gas prices impact the price of almost everything we buy, including groceries. Unfortunately, rising fuel costs, an increased demand for energy and proposed energy legislation could adversely affect electric energy costs as well.

In the face of such challenges, Kiwash Electric Cooperative is looking out for you. We've designed a demonstration program to educate members about energy efficiency and help you take control of your electric bills. It's called the "Home Energy Makeover."

HOW IT WORKS

Kiwash Electric will select one lucky member from a pool of interested applicants. That home will serve as a demonstration of the best energy efficient improvements possible with a relatively small investment. "We are excited not only for that one lucky member, but for the wealth of energy conservation information this demonstration project will provide to other members," said Lisa Willard, director of communications.

YOU COULD WIN A *Home Energy* **MAKEOVER**

If selected, your home will receive **\$2,000** worth of energy saving improvements
courtesy of
Kiwash Electric Cooperative
and Touchstone Energy.

For more details:
888-832-3362
www.kiwash.coop

If selected, Touchstone Energy® and Kiwash Electric will invest up to \$2,000 in energy efficient improvements in your home. Your home makeover could include:

- heating/AC upgrades
- new insulation
- replacement of lighting
- programmable thermostats
- new water heater
- new windows and/or appliances
- energy efficient landscaping

The lucky winner will also receive a free energy audit and advice that will ensure future energy savings.

"We want to help our members 'go green' and help them take a proactive approach to saving energy and money," said Willard.

Additional savings on products and materials used in the home makeover will come from businesses that honor the Co-op Connections savings card program.

With the Home Energy Makeover, Touchstone Energy and Kiwash Electric Cooperative are looking out for you today, and in the future.

Home Energy
MAKEOVER

OFFICIAL SELECTION RULES

Subject to the additional restrictions below, the **Home Energy Makeover** is open to any member of Kiwash Electric Cooperative which meets the following criteria:

- Applicant must be a 18 years of age or older.
- Applicant must be a home owner and said home must serve as the applicants primary residence.
- Applicants home must sit on a permanent foundation and be of conventional construction.
- Applicants home cannot be leased, rented or under contract to be sold.
- Each household is allowed only one entry.
- Employees of Kiwash Electric Cooperative and its affiliated companies, and advertising agencies, and the immediate family members of, and any persons domiciled with, any such employees, are not eligible to enter or to win. The term "immediate family members" includes spouses, parents, grandparents, siblings, children and grandchildren.

Selection of the member to receive the Home Energy Makeover will be determined by a drawing of all qualified applicants. This winner will be announced Thursday, August 28, 2008 at KEC's Annual Meeting and the successful applicant will be notified by certified mail. Member selected to participate has two weeks from the point of notification to accept the offer. After this time frame has elapsed another qualified member will

be selected and such will continue until a member agrees to participate. By participating, participant agrees to be bound by these Official Rules and the decisions of Kiwash Electric.

Member selected to participate in the Home Energy Makeover may waive their right to participate in the demonstration project. The opportunity to participate is not assignable and is nontransferable. The member that is selected to participate in the demonstration project is solely responsible for reporting and payment of any and all applicable taxes. Member selected to participate understands that they will be issued a 1099 for the products and services received as a participant in this demonstration project. Kiwash Electric Cooperative reserves the right to disqualify persons found tampering with or otherwise abusing any aspect of the selection process used to determine the member to participate in this demonstration project.

By participating, applicant authorizes the use, without additional compensation, of his or her name and/or likeness and/or voice/photograph and municipality of residence for promotion and/or advertising purposes in any manner and in any medium which may be deemed appropriate by Kiwash Electric for a maximum period of 24 months from the end of the contest.

All participants acknowledge that Kiwash Electric and/or any individuals or businesses associated with Kiwash Electric in this project may not be held liable for any loss, damages or injury associated with this demonstration project.

Member selected to participate in the demonstration project must sign a release form as prepared and accepted by Kiwash Electric, acknowledging their acceptance and understanding of the complete contest rules.

Kiwash Electric Cooperative retains the right, in its absolute and sole discretion, to make substitutions of equivalent kind or approximate value in the event of the unavailability of any prize(s) or component of the prize(s) for any reason whatsoever.

This demonstration project is subject to all federal, state and municipal laws.

Kiwash Electric Cooperative reserves the right to withdraw or terminate this demonstration project at any time without prior notice.

In the event the selection process is compromised by a virus, non-authorized human intervention, tampering or other causes beyond the reasonable control of Kiwash Electric Cooperative which corrupts or impairs the administration, security, fairness or proper operation of the selection process, Kiwash Electric Cooperative reserves the right in its sole discretion to suspend, modify or terminate the selection process. Should the selection process be terminated prior to the stated expiration date, Kiwash Electric Cooperative reserves the right to select a participant based on the entries received before the termination date.

By entering the Home Energy Makeover, you agree to be bound by all of the terms and conditions of these Official Rules. If you do not agree with these terms and conditions, do not submit an application.

With respect to any disputes regarding the Home Energy Makeover or the selection process, the decision of Kiwash Electric Cooperative is final.

The applicant must be a member of Kiwash Electric Cooperative in good standing whose home is served by Kiwash Electric.

These rules are subject to change without notice.

*It's like putting \$2,000
in the bank!*

Energy saving home improvements could include:

- new windows and/or appliances
- heating and AC upgrades
- thermostat controls
- lighting improvements
- landscaping & more!

PEAK ALERT

Help KEC shave the peak

CONSERVE ENERGY DURING PEAK PERIODS

The heat, the humidity. There's no hiding from summer in Oklahoma. During July and August when temperatures are at their most extreme, Kiwash Electric Cooperative and nearly every electric utility in U.S. keeps a close watch on system-wide energy usage.

Utilities carefully monitor what is known as "peak demand," when systemwide electricity use is at its very highest. The Kiwash Electric system peak is important because it determines what your co-op pays for wholesale power in the future.

"If we can shave that peak, the result is lower wholesale power rates," said Dennis Krueger, Kiwash Electric general manager.

The Kiwash Electric system tends to peak in July and August during the latter part of the day—generally between 4 pm and 8 pm. That's typically the time members get home from work, turn on the air conditioner, wash clothes and cook dinner.

Kiwash Electric members can take action to control the peak demand by making a few slight changes in energy use habits. To lower the peak, members should try to curtail their energy usage during peak periods.

A few small changes in the daily routine can make a difference. Simple suggestions include washing clothes later at night, cooking dinner outside on the grill rather than using the stove, and turning up your air conditioner thermostat to 78°F.

Because energy costs appear destined to climb, Kiwash Electric encourages members to adopt these wise energy habits not only during peak periods but throughout the year.

Help Kiwash Electric lower wholesale power costs: Use less energy from 4 pm to 8 pm during July and August, Kiwash Electric's peak usage months.

- Raise your air conditioner thermostat to 78°F.
- Use fans to circulate air and keep rooms cool.
- Grill dinner outside rather than turning on the stove.
- Do laundry, wash dishes and shower during off-peak hours.
- Close blinds and drapes during the day to block the sunlight.

For more energy-saving suggestions, please visit the Kiwash Electric Web site at www.kiwash.coop, or call KEC at 888-832-3362.

Convenient ways to pay your bill

You can mail your electric bill to Kiwash Electric Cooperative the old fashioned way, or take advantage of KEC's other convenient bill payment options:

AUTOMATIC BANK DRAFT: Sign up for this plan and your bill is paid automatically each month via a draft of your checking or savings account. **Some qualifications apply.*

PAY BY IN PERSON: Drop your bill off at the Kiwash Electric Cooperative office in Cordell, or at one of three authorized payment centers. (See page one for payment center locations.) For after hours drop off, please use the Kiwash Electric night deposit box.

TOP 10 Energy Efficiency Tips

from Touchstone Energy® Cooperatives
of Oklahoma

1. Clean and inspect central heating and cooling units. Your heating system and air conditioner should be serviced before each heating and cooling season, by a HVAC dealer. Keep the filters changed monthly to save energy.

2. Use compact fluorescent light bulbs. (CFLs). Install ENERGY STAR® compact fluorescent light (CFL) bulbs. ENERGY STAR light bulbs use up to 75 percent less energy and last up to 10 times longer than standard incandescent bulbs.

3. Install ceiling fans. Use ceiling fans in summer and winter to move air through your home. Ceiling fans should run clockwise in the summer, counter-clockwise at low speed in winter.

For one-stop energy efficiency information, please visit www.kiwash.coop and click on the Touchstone Energy Home Energy Savers icon. It will save you money!

4. Install a programmable thermostat. Invest in a programmable thermostat. Set it from 72° to 65° for eight hours a day in winter, and from 70° to 78° for eight hours a day in the summer. It will cut your utility bill up to 10 percent!

5. Insulate your hot water heater. You will use less energy if your water heater is insulated with a water heater blanket.

6. Purchase Energy Star labeled products. Purchase ENERGY STAR products, which are approved by the Department of Energy. You can cut your energy bills by up to 30 percent with Energy Star-labeled appliances, lighting, windows, office equipment and home electronics.

7. Shade your home from the sun. Plant trees to shade your home on the southern and western sides to reduce cooling costs in the summer. Planting shrubs, bushes and vines next to your house creates dead air space that insulates your home in both winter and summer.

8. Add cellulose insulation. Add more insulation to the attic and crawl spaces. Insulate around furnace ducts, plumbing and boiler pipes. Cellulose insulation is made from recycled newspapers, is sound proof, fire resistant, insect resistant and is the best choice for insulation.

9. Insulate heating ducts and keep them in good repair. If you have small cracks or holes in your air ducts, warm air from the furnace can escape causing a loss of up to 60 percent of warmed air. Use duct tape to repair and seal holes.

10. Stop the drafts. Caulk, seal and weather-strip around all exterior seams, cracks and openings. Reduce drafts from the inside by replacing weather-stripping; caulking leaky doors, windows, chimneys and fireplaces. Install foam gaskets behind outlet covers.

KIWASH ELECTRIC COOPERATIVE, INC.

Providing the service that lights up your life.

Splish splash, it's summer!

Make it safe—avoid electrical hazards near water.

Summer is officially here and that means it's time to cool down. While soaking up the sun at the lake or pool is a great way to relax, Kiwash Electric reminds you to take precautions when you're near electricity. The old adage "water and electricity don't mix" is a good one. For a safe summer, please heed these simple tips:

 Keep outlets near hot tubs, spas, and pools covered and dry between uses. New outlet covers are available that offer weather protection while a plug is inserted into the outlet.

 Keep cords and plugs away from hot tubs, spas, pools, and puddles from wet bathers.

 Never handle electrical items, plugs, or outlets when wet. If an electrical product falls into water, do not reach into the water for it. Make sure you are dry and not in contact with water or metal surfaces, and unplug it immediately or shut off the circuit powering the item.

 Outlets on or near hot tubs, spas, and pools should be protected by a ground fault circuit interrupter (GFCI). Many older swimming pools pre-date the introduction of GFCIs in the 1970s. These pools should be upgraded to add GFCI protection for branch circuits supplying power to underwater pool lights operating above 15 volts, and outlets within 20 feet of the pool.

Please remember, however, that when a person gets immersed in an isolated body of water like a hot tub, the water could become electrified without involving a ground fault as the electric current passes through water (and perhaps a person) from one electrical pole to the opposite pole. In this case, the GFCI may not provide shock or electrocution protection.

You'll find more safety tips plus plenty of other useful information including energy saving ideas on your Kiwash Electric Cooperative Web site at www.kiwash.coop. *Have a safe summer!*
